

When parents are both registered in Iceland, but at different addresses, parents must decide with which parent the child/children will be registered in the population register. Both parents will be registered as the child's parents, but the child can only be connected to one family registration code in the population register. Please note which parent the child should be connected to.

We, _____ dob. _____ and
_____ dob. _____, hereby
confirm that our child _____, dob. _____ should
be connected to mother/father _____, dob. _____ in the
population register.
