ICELANDIC ID CARD 2024

Iceland has started to issue ID cards according to the provisions of reglulation (EU) 2019/1157.

All Icelandic citizens can apply for ID cards and the cards are issued by Þjóðskrá Íslands (Registers Iceland). Registers Iceland is the agency for civil registry and is the issuer of Icelandic travel documents and ID cards.

This is the first travel document in the world issued in portrait format according to a new ICAO specification for TD1 documents. The travel document ID card is issued as ICAO travel document type „ID", legally valid for use within the European Economic Area. Another version is also issued as ICAO document type „II" for domestic use in Iceland only and is not a travel document.

-shadow of outline map of Iceland

positive microtexts
with variable letter heights

ICAO 2D barcode (IDB)

offset printed guilloche
lines

colour transition ABA - rainbow printing

The whole card is rainbow colouring in ABA transitions. The colour of the background and microtext is a mix of two rainbow colouring transitions changing gradually along the long side of the card: one from turquoise to light brown then again to turquoise and the other from blue, to warm grey then again to blue.

More precisely, you can see rainbow effect on graphic bar below.

1 blue texts of the background

2 green outline map of Iceland

3 red guilloche lines in the area
of card holder's image
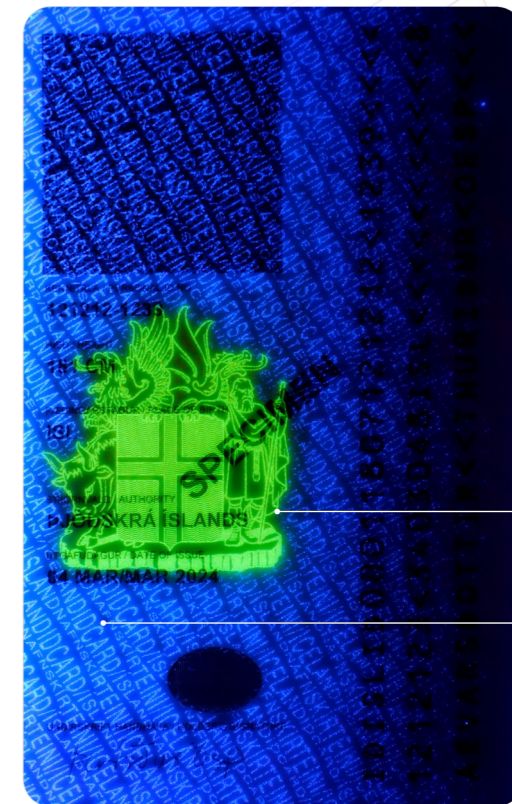

1 blue texts of the background

2 green outline Icelandic coat
of arms

The appearance of the background of the document was achieved by composing together various elements such as lines, geometric figures and microtexts in order to create complex shapes and visual effects, which cannot be easily copied and reproduced.

MATERIAL

— Polycarbonate suitable for laser engraving, including tactile elements.

— Card material showing no luminescence under ultraviolet light.

— ID-1 card format, compliant with ISO 7810.
